

# cashPod 6023

**Introducing the cashPod 6023 ATM, Australia's best mid-sized, high volume ATM.**

Manufactured by iCash Australia Pty Limited, the cashPod series comes with a wide range of options and is customised to suit any retail location. Loaded with cutting edge technology and premium features, iCash's cashPod is **"simply the best choice for your business."**

## Functions

**Reliability** - The cashPod 6023 is a state of the art full function ATM. This technology has been developed over 10 years of ATM equipment design and manufacturing. The cashPod incorporates software applications developed exclusively for the Australia retail market.

**Scalability** - Utilising Windows XP as its operating platform with an 80GB HDD, the cashPod allows for merchant specific customisation for ATM operators.

**Security** - A small footprint and modern design make the cashPod an attractive device for all retail locations. The cashPod features 3 or 4 x 2,000 mechanical motor driven cassettes to ensure limited note jams with the added security of bolstered safe hinges. It also has an on-board security camera, and a shutter based note presenter and has been designed to prevent cash trapping fraud to ensure user friendly transactions.

**iRams value-added software** - iRAMS enables users to monitor, in real time, over 50 diagnostic parameters and error conditions of the ATM using any web-enabled device such as a PC with Windows software, Blackberry or Apple iPhone/iPad. Parameters include the amount of cash in each cassette, the number of withdrawals (daily and month-to-date) and dispensed amount.

**cashPod 6023, is a market leading ATM and has some of the most advanced software applications specifically designed for the Australian retail industry.** All cashPod devices come with a warranty and outstanding reliability incorporating fast transaction speeds make the cashPod 6023 "simply the best choice for your business."

### cashPod 6023

# Features

## Operating System

- PC based ATM platform utilising Windows XP operating system for greater transaction processing speed and functionality
- Provides versatility when developing client specific applications

## High Quality Graphics Display

- Large 15.1" colour monitor with an infrared touch, LCD screen (1.024 x 768 SVGA resolution) ideal for on-screen advertising and other direct marketing promotions
- Pre-set touch "buttons" for cash withdrawals and account balance enquiries
- Toughened glass for high traffic venues
- Optional voice prompts to help the elderly and the vision impaired

## Security

- Visa PED approved PINpad (EPP) and Triple DES PIN encryption to protect cardholder data
- Device meets and exceeds all conditions specified on APCAS approval list
- Strategic placement of PINpad shield to protect cardholder data input details, with built-in mirror to prevent shoulder surfing
- On-board surveillance camera
- Security shutter to help prevent fraud and cardholder disputes
- Multiple ATM merchant management cards can be issued to different users to restrict access to certain machine functions
- High security safe 12mm plate

## EMV Card Reader

- Type 2 certified EMV dip card reader

## Active Diagnostics

- Visual diagnostics enables merchants to identify operational problems quickly, minimising downtime
- Two-way remote session performs diagnostics including checks of system processes for normal operation, individual device testing and analysis of diagnostic log files. cashPod can then rectify problems remotely or dispatch an engineer to your location with the information and parts needed for repair. This reduces service fees and lost revenue due to down time.

## Printer

- 80mm graphical thermal receipt printer with straight paper path

## Communication

- Optional wireless communication for faster on-site installation and transaction processing speeds, and lower communications costs
- Dial-in TCP/IP and ADSL is also available

## Cash Dispensing

- Front loading cassettes for easy service and maintenance
- New advanced high-speed friction cash dispenser mechanism (seven notes per second) minimises disputes or cash jams
- 3 or 4 large capacity currency cassettes (each standard cassette holds 2000 notes with or without lockable steel casing)
- Reverse dispenser mechanism to clear own note jams without accessing ATM safe, reducing the need to open the safe during peak periods.
- All cassettes available for configuration of any denomination (specialising in high volume gaming venues)

## Appearance & Dimensions

- Sleek, contemporary appearance
- Small foot print and ergonomic design to be installed where space is a premium
- Height 1,425mm, Width 460mm, Depth 747mm, Weight 350kg

## Signage

- Complimentary or optional signage to increase the visibility of your ATM

## Miscellaneous

- Uninterrupted power supply to eliminate damage from power surges
- Standard battery backup to complete active transactions in the event of power loss
- Managed shutdown in the case of total power outages
- Automatic error recovery designed to maximise uptime
- Merchant reporting includes detailed monthly reports, accurate cash information, transaction activity and revenue generated by transactions
- Merchant elected settlement time each day
- Optional harm minimisation functionality
